PROFESSIONAL SUMMARY

Customer Success Engineer with 4+ years providing in-depth technical and architectural guidance to customers across cloud-native platforms. Skilled in GitLab, DevSecOps, Agile, Zoom, and Go, with strong communication and presentation strengths. Reduced production issue resolution time by 40% as a subject matter expert serving Fortune-media-scale enterprise customers.

SKILLS

Customer Success - Technical Architecture - DevSecOps - GitLab - CI/CD - Agile - Scrum - Zoom - Go - Recruiting - Talent Acquisition - Training & Enablement - Python - Java - Node.js - TypeScript - Kubernetes - Docker - AWS - Terraform - Apache Kafka - SQL - Communication - Presentation - Time Management

EXPERIENCE

Software Engineer - Vanguard

08/2025 - present

- Provided in-depth technical and architectural guidance to customers as subject matter expert, reducing production issue resolution time by 40%.
- Architected scalable backend microservices in Go, Python, and Java Spring Boot, enabling independent deployments with less operational overhead.
- Engineered high-throughput event-driven systems with Lambda and SNS/SQS, ensuring 99.99% reliability for Fortune-media-scale customers.
- Led product enablement and training sessions over Zoom for 30+ members, improving onboarding speed and reducing repeat support requests by ~30%.
- Built DevSecOps pipelines with GitLab CI/CD and Terraform, automating deployments to meet every single release SLA through Agile delivery activities.
- Supported recruiting and talent acquisition by interviewing candidates and advising on compensation banding, accelerating engineering hires by ~25%.

Associate Software Engineer - Xebia

01/2022 - 12/2023

- Provided technical and architectural guidance and presentations to customers, translating complex concepts into clear, actionable steps with less ambiguity.
- Delivered scalable RESTful APIs and microservices in Go, Python, Java Spring Boot, and Node.js as subject matter expert for backend integrations.
- Implemented event-driven architecture with Apache Kafka, reducing service failures by 35% through enablement activities and process improvements.
- Optimized SQL queries and Redis caching, improving API response times by 35% under heavy load across customer-facing services.
- Containerized applications with Docker and Kubernetes and automated provisioning via Terraform on AWS, improving CI/CD deployment efficiency by 40%.
- Contributed to recruiting through technical interviews and mentored new members, strengthening the talent acquisition process for the team.

Engineer Trainee - Xebia

01/2020 - 12/2021

- Developed enterprise applications using Angular and Python/Java backend services through Agile activities, supporting internal customers and members.
- Built and optimized SQL queries, stored procedures, and schemas across MySQL and MongoDB, improving query execution time by 20%.
- Provided in-depth documentation and guidance on RESTful service contracts using Swagger/OpenAPI, building matter expertise and a repeatable process for the team.
- Increased unit test coverage to 95% using JUnit and Python automation, reducing defect rates with less rework across release cycles.
- Delivered clear technical presentations and training to onboarding members, including veterans transitioning

into tech, strengthening team communication.

- Managed competing deadlines with strong time management, completing every assigned deliverable on schedule across concurrent Agile sprints.

EDUCATION

Master of Science in Computer Science - University Of North Carolina At Charlotte

CERTIFICATIONS

- AWS Certified Developer Associate
- MongoDB Certified Developer
- Infosys Certified Software Programmer
- NPTEL Certified Java Developer
- AWS Academy Graduate - AWS Academy Data Engineering
