PROFESSIONAL SUMMARY

div class= content-intro p span style= text-decor with 4+ years building scalable web platforms and products using TypeScript, JavaScript, Angular, React, Vue.js, Python, Java, and AWS. Skilled in writing clean, testable code with Jest, Cypress, CSS/Sass, and Webpack tooling. Delivered high-availability software that improved performance by 35% and cut production issue resolution time by 40%.

SKILLS

TypeScript - JavaScript - Angular - React - Vue.js - Java - Python - Kotlin - Go - C - C# - CSS - Sass - Less - Jest - Cypress - Webpack - AWS - Node.js - GraphQL - REST - UX - SQL

EXPERIENCE

Software Engineer - Vanguard

08/2025 - present

- Architected scalable backend platform services using Python, Java, and Kotlin Spring Boot microservices, enabling modular, service-oriented product deployments.
- Built responsive Angular and React single-page applications with TypeScript, JavaScript, and Vue.js components, improving UX and front-end load time by ~35%.
- Engineered reusable UI components styled with CSS, Sass, and Less, bundled via Webpack, cutting build times by ~30% for faster development cycles.
- Wrote comprehensive Jest and Cypress test suites, raising automated front-end coverage and reducing regression defects by ~30%.
- Optimized complex SQL queries, stored procedures, and data models across relational and NoSQL stores, improving reporting performance by 35%.
- Engineered high-throughput event-driven systems on AWS using DynamoDB Streams, Python/Node.js Lambda, and SNS/SQS, ensuring 99.99% reliability and recovery.
- Deployed cloud-native applications on AWS and implemented Splunk observability, reducing production issue resolution time by 40% across business-critical software.
- Built compensation and pay transparency reporting tools in C#, surfacing relevant data and qualifications information to HR and recruiting teams across ~1,200 records/day.

Associate Software Engineer - Xebia

01/2022 - 12/2023

- Developed backend applications using Python, Java, Go, C#, and Node.js, delivering scalable RESTful APIs and microservices for business products.
- Built dynamic Angular and Vue.js front-end applications with TypeScript, JavaScript, Sass, and Less, enhancing UX consistency across platforms.
- Configured Webpack build pipelines and authored Jest and Cypress tests, improving code quality and cutting front-end bugs by ~35%.
- Optimized SQL queries, joins, views, and stored procedures, improving API response times by 35% and enabling reliable data recovery.
- Implemented event-driven architecture with Apache Kafka, reducing inter-service dependency failures by 35% across ~50 daily deployments.
- Integrated CrashPlan-based backup and recovery workflows into platform services, ensuring secure data protection without downtime for end users.
- Documented RESTful and GraphQL APIs and supported recruiting demos by writing clear technical information for relevant stakeholders and/or candidates.

Engineer Trainee - Xebia

01/2021 - 12/2021

- Developed enterprise applications using Angular front ends and Python/Java/C backend services for transactional platforms.
- Built Angular modules with TypeScript, JavaScript, and Reactive Forms, applying clean CSS and Sass styling for an intuitive UX.

- Optimized SQL queries, stored procedures, and relational schemas, improving query execution time by 20% on MySQL and MongoDB.
- Authored RESTful APIs with Swagger/OpenAPI and secured services using OAuth2, supporting business products with documented qualifications and information.
- Increased unit test coverage to 95% using JUnit, Jest, and Python test automation, improving development reliability for each position release.

EDUCATION

Master of Science in Computer Science - University Of North Carolina At Charlotte

CERTIFICATIONS

- AWS Certified Developer - Associate
- MongoDB Certified Developer
- Infosys Certified Software Programmer
- NPTEL Certified Java Developer
- AWS Academy Graduate - Data Engineering
